■ Career Objective

A highly motivated software professional with comprehensive knowledge of software techniques, and good experience of existing software applications or IT related activities. I am a Software Developer and IT Consultant with extensive knowledge on Web & Mobile Apps Development along with various Database Administration & Custom Software Development.

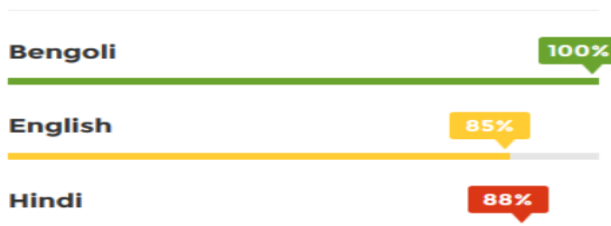

An ambitious, highly resourceful, flexible, innovative, enthusiastic and self-motivated individual who has the necessary and extraordinary IT skills, personal attributes and training experience required for a successful career at the highest levels. Boasting by a strong training background and a proven track record of bringing value to a Business, as well as possessing valuable customer facing skills and an agile technical mind that is able to come up with innovative technological solutions to seemingly intractable problems. Right now I'm keen to find a Top position within an ambitious company that is renowned for hiring exceptional people and for giving them unparalleled opportunities to build their careers and capabilities and best quality service.

As a Software Engineer, my objective is to make a positive impact on clients, co-workers, and the Internet using my skills and experience to develop and design compelling and attractive web and mobile applications. I enjoy working on projects that involve a mix of web and graphic design, web development, mobile app development and designing, database management and programming and custom software development. In addition, I offer expert search engine optimization and social media marketing.
